MULTI-STATION HEALTHCARE OPERATING SYSTEM • LOCAL CLINIC EDITION

# APEX CLINIC HEALTHCARE OS

The Complete Digital Operating System for Modern Clinics, Poly-Clinics & Medical OPDs

Touchscreen Kiosk • TV Queue Display • Doctor Cabin Workstation • In-House Pharmacy POS • Billing & Triage

100% Offline-Ready Progressive Web Architecture • Thermal POS & Laser Printing • Zero Cloud Lock-in

CURRENT REALITY

## The Chaos in Traditional Clinics

- Waiting Room Clutter: Crowded receptions, disputes over turn, line jump
- Handwritten Prescriptions: Unreadable slips, dosage errors, zero past EM
- Revenue & Medicine Leakage: Patients taking prescriptions to external p
- Cashier Discrepancies: Missing fee records, manual registers, no shift au
- Internet Dependency: Cloud software freezes during internet or electricity

APEX SOLUTION

## The Apex Synchronized Experience

- Automated Touch Triage: Patients get queue tokens via 3D visual symptom car
- Real-time Lounge TV Sync: Video board + audio chimes announce next token.
- 1-Tap Doctor Rx Pad: Pre-loaded routine medicines, duration and lab chips.
- Dual-Side Pharmacy POS: Touch cash calculator, stock deduction, direct OTC
- Offline Resilience: Runs 100% offline; synchronizes across all cabin devices.

**75%**
**FASTER INTAKE**
Touchscreen self-token issuance under 30s

**0%**
**RX LEAKAGE**
Direct electronic routing to in-house pharmacy

**35%+**
**PATIENT CAPACITY**
Faster consults & seamless queue calling

**100%**
**OFFLINE READY**
Zero downtime during local network outages

## Complete 6-Station Clinical Architecture

Designed specifically for local clinics, healthcare centres, maternity homes, and specialist polyclinics.

01 **Touchscreen Patient Kiosk** — PATIENT SELF-SERVICE — Location: Patients / Front Lobby

3D energetic symptom checklist, department routing, mobile appointment check-in, priority emergency token triage, auto-closing thermal slips.

02 **TV Lounge Queue Display** — AUDIO-VISUAL CALLING — Location: Waiting Room / Patients

Big-screen active queue token matrix, audio vocal call announcements with soft hospital chime, highlighted emergency patient alerts, wait estimates.

03 **Doctor Cabin Workstation** — CLINICAL HUB — Location: Physicians & Specialists

Real-time KPIs (Seen Today/Weekly/Monthly), interactive queue hub, 1-tap quick Rx pad with frequency/duration chips, labs ordering, past Rx repetition, 2s auto-close print.

04 **In-House Pharmacy POS Desk** — DISPENSING & RETAIL — Location: Pharmacists & Dispensers

Dual-side touch calculator keypad for Doctor Prescriptions & Walk-In OTC sales, cash tendered & exact change calculation, automated formulary stock deductions.

05 **Reception & Billing Desk POS** — FINANCIAL SETTLEMENT — Location: Cashiers & Receptionists

Walk-in registration with triage vitals, appointment scheduling, upfront fee collection vs in-cabin collection, 80mm/58mm thermal slips, A4 laser invoices, shift reports.

06 **Super Admin Multi-Tenant Control** — MULTI-TENANT GOVERNANCE — Location: Clinic Owners & Directors

Centralized Clinic Feature Management Panel: enable/disable kiosk, pharmacy, queue TV, cabins per facility. Emergency procedure pricing, 30-day TOTP 2FA, full audit log.

**Built Specifically for Local Realities:** Native PKR (Rs.) currency, works with all local thermal slip printers (80mm/58mm), zero monthly cloud fees, offline load-s

Call now for on-site live demonstration: +92 (300) 123-4567 | info@apexclinic.com | Instant 1-hour plug-and-play setup.

## STATION 1: Touchscreen Patient Kiosk (Intake & Smart Triage)

PATIENT LOBBY & ENTRANCE

Eliminates front-desk crowding and empowers patients to check in effortlessly via interactive touchscreen tablet or kiosk.

### ' 3D Visual Symptom Cards

High-definition 3D medical illustrations (Cardiology, Dermatology, Orthopedics, Pediatrics, Diabetes, Fever, Respiratory) enable patients of any literacy level to self-triage their chief complaint in seconds.

### ' Automated Doctor & Cabin Routing

The intelligent clinical rule engine automatically maps the selected symptom to the appropriate specialist cabin (e.g. skin rash -> Cabin 2 Dermatology; chest pain -> Cabin 1 Cardiology) balancing clinical load.

### ' Emergency / STAT Priority Bypass

Critical complaints (severe crushing chest pain, acute trauma, dyspnea) trigger immediate STAT triage flags, issuing priority EMG-XX tokens and routing directly to the Treatment Room head-of-line.

### ' Mobile Appointment Check-in & Slip

Patients with existing bookings enter their mobile number for instant verification and priority queue slip printing with zero reception delay. Auto-closes in 2 seconds to keep kiosk ready for the next patient.

## STATION 2: TV Lounge Queue Display (Audio-Visual Calling)

WAITING HALL DISPLAY

Turns any standard Android Smart TV, HDMI screen, or tablet into an automated airport-style patient queue announcement board.

### ' Automated Hospital Voca Announcements

Web Audio API chime followed by realistic text-to-speech announces: "Token C-104 please proceed to Cabin 2 with Dr. Elena" eliminating shouted names and waiting confusion.

### ' Visual Spotlight & Multi- Board

High-contrast large-font visual cards highlight newly called patients, active consultations across all 5 cabins, emergency priority banners, and transparent estimated wait times.

### ' Instant Multi-Screen Synchronization

Uses high-speed browser BroadcastChannel technology. Doctor cabin actions reflect on the waiting TV in under 5 milliseconds with zero internet required.

## STATION 3: Doctor Cabin Workstation Console (Clinical Command Hu

SPECIALIST CONSULTATION

Engineered alongside practicing doctors for lightning-fast consultation workflow without keyboard clutter or administrative fatigue.

### ' Real-Time KPI Dashboard Bar

Monitors clinical productivity instantly: Patients Seen Today, Weekly (7-day), Monthly (MTD), Active Queue count with STAT emergency alert, Prescriptions issued today, Diagnostic labs ordered, and average consultation time (e.g. 7.2 min).

### ' Queue Command Hub & Next-Patient Hero

Clear visual card shows the next patient in line with token, triage severity, symptoms, vitals (BP, Temp, Pulse, SpO2), and upfront payment status. 1-tap "Call to Cabin", "Direct Consult", or "Return Token" if patient stepped out.

### ' Redesigned 1-Tap Prescription Pad

Instant Quick-Add bar for routine medications (Panadol 500mg, Augmentin 625mg, Brufen 400mg, Omeprazole 20mg, Cetirizine, Flagyl). Inline interactive dosage frequency pills (OD, BD, TDS, PRN) and duration chips (3d, 5d, 7d, 14d, 30d).

### ' Diagnostic Lab Test Order Chips

1-tap ordering of routine diagnostics (Complete Blood Count - CBC, Random Blood Sugar - RBS, Serum Creatinine, Lipid Profile, 12-Lead ECG). Diagnostic fees are itemized and transmitted automatically to the reception cashier.

### ' Past Visit Regimen Repeat (1 Click)

For returning chronic patients (Diabetic, Hypertensive, Cardiac), doctors can view past consultation history and repeat previous multi-drug prescriptions with a single click, saving 3+ minutes per returning patient.

### ' Automated 2-Second Auto-Close Print Mo

Generates beautiful hospital-grade prescriptions in A5 Landscape, A4 Laser, or 80mm Thermal formats. Automatically closes 2 seconds after triggering print or PDF to keep the doctor focused on clinical care.

**+P Clinical Result: Reduces doctor typing time from 4 minutes to under 45 seconds per pres**

## STATION 4: In-House Pharmacy POS Desk (Dual-Side Counter)

DISPENSARY & RETAIL POS

Eliminates revenue leakage by capturing in-house medicine sales while managing retail walk-in customer purchases seamlessly.

### ' Dual-Side POS Calculator Keypad

Features identical touch calculators on BOTH sides of the pharmacy: Side A for Doctor Electronic Prescriptions queue and Side B for Walk-in OTC Retail customer counter sales with discounts.

### ' Cash Tendered & Instant Change Due

Pharmacists enter cash received with quick denomination buttons (Rs. 100, 500, 1000, 5000); system instantly computes change due, preventing manual cash calculation errors during busy hours.

### ' Automatic Formulary Stock Deductior

Every dispensed prescription and OTC sale automatically deducts quantities from the inventory formulary in real time. Features low-stock warning chips, batch numbers, and expiry tracking.

### ' Itemized Dispensing Receipts & Thermal

Prints clear medicine receipts showing patient token, dosage instructions ("Take 1 tab after meals"), price per unit, total amount, pharmacist signature line, and store license details.

## STATION 5: Reception Desk & Cashier Billing POS

FRONT-DESK CASHIER

High-speed intake for walk-in patients, appointment bookings, vital signs recording, and flexible fee collection.

### ' Rapid Token Issuance & Triage Vitals

Front-desk staff can issue walk-in tokens in 10 seconds while recording vital signs (Blood Pressure, Heart Pulse, Body Temp, Oxygen SpO2, Weight) directly onto the patient digital profile.

### ' Flexible Payment Collection Models

Supports local clinic billing flexibility: Upfront Reception Payment (PAID_UPFRONT), Pay Directly in Doctor's Cabin (PAY_IN_CABIN), or Settle at Cashier Counter after consultation.

### ' Dual Printer Support (Thermal & Lase

Generates 80mm/58mm thermal queue tokens with ZERO fee amounts for clinical privacy, and full A4/A5 laser medical invoices with insurance co-pay, discounts, and tax itemization.

### ' Shift Closure & Financial Reconciliation

1-click Shift Report calculates total cash collected, card swipes, discounts issued, pending fees, and gross clinic revenue, ensuring transparent shift handover between staff.

## STATION 6 & 7: Super Admin & Clinic Admin Governance

MULTI-TENANT RBAC

Enterprise-grade multi-clinic management, modular feature toggles, security locks, and emergency procedure catalogs.

### ' Super Admin: Clinic Feature Control

Centralized toggle panel allowing Super Admins to enable or disable specific modules (Patient Kiosk, TV Lounge Display, Doctor Cabin Console, Billing POS, In-House Pharmacy) for each clinic branch independently without altering other branches.

### ' Clinic Admin: Emergency Procedures & K

Clinic Admins manage minor surgical procedures (Wound Dressing, IV Cannulation, Catheterization, Suture Repair), consumable pricing, emergency kit packs, and trauma routing directly from their dashboard.

### ' Multi-Tenant Isolation & 1-Click Clini

Seamlessly switch between Main Branch, Satellite Medical Centers, and Specialty Units. Each clinic maintains its own isolated patients, doctors, formulary stock, invoices, and fee configurations.

### ' Enterprise Security & Audit Trail

Role-Based Access Control (RBAC), Kiosk device PIN screen locks, 30-day Google Authenticator (TOTP) renewal tracking, and comprehensive audit logs recording every financial and clinical change.

## Engineered for Local Infrastructure Realities

ZERO INFRASTRUCTURE HEADACHE

Traditional cloud systems fail when the local internet disconnects or during load-shedding. Apex OS is designed differently.

### & 100% Offline-Resilient (PWA)

Runs locally inside any modern browser as an installed PWA. Continues generating tokens, writing prescriptions, and dispensing medicine with ZERO internet connection.

### & Zero Hardware Lock-In

No need to purchase expensive proprietary terminals. Operates on existing Windows/Mac laptops, Android tablets, touch monitors, and standard Android Smart TVs.

### & Local Thermal & Laser Printers

Works seamlessly with standard POS receipt printers (80mm/58mm Xprinter, Rongta, Epson via USB/LAN) and regular A4/A5 desktop laser printers without special drivers.

### & Native PKR & Dual Cash Workflows

Full native support for Pakistani Rupee (PKR Rs.) and foreign currencies, accommodating local clinical fee habits (cash at desk, pay doctor inside cabin, or cashier).

## Measurable Return on Investment (ROI) for Clinic Owners

How Apex Clinic OS directly increases your clinic's revenue, patient retention, and operational speed.

| OPERATIONAL METRIC | MANUAL / PAPER CLINIC | WITH APEX CLINIC HEALTHCARE OS |
|---|---|---|
| **Patient Registration Time** | 3 - 5 minutes per patient at reception desk | ' Under 25 seconds via Touch Kiosk toker |
| **Doctor Prescription Generation** | 3 - 4 minutes handwriting on paper slips | ' Under 45 seconds using 1-tap routine d |
| **Pharmacy Medicine Leakage** | 40% - 60% of patients purchase outside | ' Electronic routing to in-house desk rec |
| **Waiting Hall Noise & Frustration** | Frequent crowding, shouting names, complaints | ' Airport-grade vocal announcements & T |
| **Daily Financial Reconciliation** | 1 - 2 hours manual register tallying at night | ' Instant 1-click Shift Report with cash b |
| **Software Downtime Risk** | Frequent freezes during internet disconnection | ' 100% offline continuous operation via P |

## Deployment Roadmap: Live in Under 60 Minutes

**STEP 1**

### Free On-Site Demo

Our clinical specialist visits your clinic or runs a live remote walkthrough with your doctors and managers.

**STEP 2**

### 60-Min Network Setup

We configure your existing tablets, TVs, and POS printers on your local Wi-Fi router. Zero rewiring needed.

**STEP 3**

### Staff Onboarding

Comprehensive 30-minute hands-on training for receptionists, doctors, dispensers, and clinic managers.

**STEP 4**

### Go-Live & Support

Clinic begins live patient intake immediately. Dedicated local helpline and 24/7 technical assistance.

## LIMITED-TIME LOCAL LAUNCH PROMOTION • COMPLETE CLINIC SUITE

### Standard All-Inclusive License Package:

' Unlimited Patient Tokens & OPD Registratio
' Full 5 Doctor Cabins + 1 Treatment Room
' In-House Pharmacy POS + Unlimited Drug F
' TV Lounge Audio-Visual Announcement Syst
' Touchscreen Patient Kiosk with 3D Sympton
' Zero Per-Patient Transaction Fees (Lifetime
